Summary

- Computer Science undergraduate at IIIT Agartala and full-stack developer experienced in building scalable web applications and reliable backend systems. Strong in MERN and Next.js, with hands-on experience developing REST APIs, real-time systems, microservices, and third-party integrations. Proven problem-solving skills with 600+ LeetCode problems solved and a 1860 rating.

Education

Indian Institute of Information Technology, Agartala

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.83

Experience

AWDH Technology

May 2025–July 2025

Software Developer Intern **Certificate:** [view](#)

Lucknow

- Contributed to production web applications, working across full-stack development, feature implementation, and real-world software engineering practices.
- Collaborated with the development team across debugging, testing, and deployment, contributing to the end-to-end software development lifecycle.

Projects

Aligno

- Built a multi-tenant OKR SaaS with organization, department, team, and employee management, including role-based access control and analytics dashboards.
- Implemented OKR workflows, performance reviews, bulk assignment, approval pipelines, AI-powered suggestions, and automated notifications, with subscription-based feature gating and Razorpay payments across pricing tiers.
- Reduced administrative effort by automating OKR assignment, approvals, and reporting.

Mystery Feedback

- Built an anonymous feedback platform with personalized user links, secure authentication, and REST APIs for collecting and managing feedback while preserving sender anonymity.
- Engineered an AI-assisted feedback system using OpenAI API to generate personalized feedback suggestions, with automated email notifications and validated form workflows.
- Implemented user profile management, feedback history, and personalized dashboards, providing a centralized experience for managing received feedback and user interactions.

VelocityDB

- Developed a custom C++ database engine with file-based storage, page management, custom record formats, and full CRUD support optimized for fast data access.
- Built a desktop application using React + Electron.js with a table viewer, record editor, data visualizer, and a live query console for smooth database interaction.
- **Tech stack:** C++, File I/O, OOP, Templates, Memory Management, Electron.js, React.js, Git.

Achievements

- **Codeforces:** Rating 1159 **Profile:** [aviralcoder-00](#)
- **LeetCode:** Rating **1860**, 600+ problems solved **Profile:** [aviralcoder](#)
- Qualified for Meta Hacker Cup 2025 Round 2 with ranks **2056** in Round 1 and **1309** in Round 2. **Certificate:** [view](#)
- Earned an Oracle digital badge upon completing Oracle's certification requirements **Certificate:** [view](#)
- Won the Saras AI Hackathon and multiple college hackathons. **Certificate:** [view](#)

Technical Skills

Languages: C++, C, JavaScript, TypeScript

Frontend: React.js, React Native, Tailwind CSS

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication

Frameworks: Next.js

Databases: MongoDB, PostgreSQL, MySQL

CS Fundamentals: Operating Systems, Database Management Systems, Computer Networks, DSA, Competitive Programming.

Other Tools: Git, GitHub, VS Code
